

News Release

Speed and Security in Digital Banking Transactions with Mobile Push Notifications Technology from **CubelQ**

[EN] Athens, GR, **September 3rd, 2021** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions announces implementation of **Mobile Push Notification Technology for Digital Banking Transactions Authorization and Customer Authentication**.

The end-user is a Bank established ninety-five years ago. She is listed in Athens Stock Exchange with major shareholder the Greek State and the State Works Contractors Pension and Insurance Fund, boasting a network of 50 branches in the main cities of Greece. The Bank, as dynamic financial services company, offers a full range of banking and investment products and services as well as deposits, insurance products, mutual funds and brokerage services, for individuals, small & medium enterprises and large companies. The Bank monitoring the new conditions of a rapidly growing market, responding to customer needs and ready to meet their requirements, has expanded her activities in all financial sectors.

With **PSD-II** evolution the Bank required a contemporary, robust, flexible and scalable **Strong Customer Authentication solution** to service her Digital Banking customers remote authentication needs while also **covering PSD-II** strict technical and security requirements.

Customer satisfaction and high security is key for the Bank. The Bank would like to address both customers experience and security and therefore was driven to provide her customers a remote authentication solution that would be convenient – easy to setup and use and also highly secure.

The bank selected **CubelQ's Strong Customer Authentication, PSD-II compliant technology** which includes also **HID ActivID™** Authentication server and **HID Approve™** mobile application client.

ActivID™ is a omni channel customer and transaction enterprise-wide authentication server, scalable from several hundred to several million users, covering all possible needs for customers, users and transactions authentication in the financial, government, healthcare and enterprise industries and supporting all known authentication clients such as hardware tokens,

smart cards, biometric devices, soft tokens, SMS, mobile clients, certificates, adaptive clients and other.

HID Approve™ is a mobile authentication client incorporating and using “push notification” technology, dual communication channels, secure execution environment and RSA cryptographic technology. It is provided as “white label” or branded mobile application or as an SDK to be integrated to mobile banking or other mobile application.
