

## News Release

### Authentication Services for Temenos Core Banking and Channels Software Solutions with ActivID®

[EN] Athens, GR, **September 20<sup>th</sup>, 2021** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions announces the ongoing integration of **ActivID® Authentication Services with for Temenos Core Banking and Channels software**.

**ActivID® Authentication services** provide a complete, versatile authentication solution for banks seeking to easily add authentication, from user name and password to a variety of strong authentication mechanisms. The ActivID® Authentication Service adds strategic value by giving banks deploying **Temenos Core Banking and Temenos Channels Software Solutions** the flexibility to meet current and future needs for a range of user, device and service-channel options.

#### **Temenos Core Banking, Internet Banking and Omni Channel Users**

ActivID® Authentication Services provides secure multi-factor authentication and transaction signing capabilities for banks using Temenos Core Banking and Temenos Channels Software Solution. **Pre-configured with Temenos Core Banking** for easy deployment ActivID® Authentication Services supports automatic creation of user credentials when new users are added via Temenos Core Banking screens. The management of password lock/unlock and other critical authentication processes can be made directly from Temenos Core Banking admin screens. Banks can track authentication events directly in Temenos Core Banking user views. ActivID® Authentication Services also provides secure multi-factor authentication and transaction signing for **online banking customers** on Temenos Connect Internet Banking.

The **ActivID® Appliance** enables organizations to tailor authentication methods to the needs of specific groups of users, providing each with the right balance of security, cost and convenience necessary to meet their business objectives, as well as ensure regulatory compliance and policy adherence.

It also supports the **broadest range of authentication methods**, from strong passwords to certificate-based authentication, including two-factor OATH standards-based hardware tokens, soft tokens, display cards, push notification services (HID Approve), device forensics, email, SMS and Custom SMS Out-of Band One-Time Password (OTP) options and Static Credentials such as Passwords, PINs, Memorable Facts and Secret Questions. By using ActivID® Authentication

Services organizations are able to meet regulatory compliance requirements meeting mandates such as PSD2, FFIEC, PCI-DSS and GDPR. With the optional **ActivID® Threat Detection Service**, the appliance can also transparently protect online transactions from a wide range of threats, including Trojan and man in-the-browser (MitB) attacks.

Available as either a software solution, hardware appliance or a virtual appliance, the solution helps to reduce costs with easy installation, worry free tokens that last up to eight years, and simple integration into an organization's existing banking infrastructure.
