

News Release

A Specialized Bank Achieves PSD-II Compliance with Mobile Push Notification Technology from **CubelQ**

[EN] Athens, GR, **October 4th, 2021** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions announces implementation **Mobile Push Notification Technology at a Greek Specialized Bank**.

The Bank was established in 2002 with focus to the shipping industry. She gained the trust of participants in this demanding and specialized market and soon was found among the major trustees of syndicated loans in Greece. Gradually the Bank has extended its activities by providing banking and investment products and services to a wide range of customers, including Individuals, Medium and Large-size enterprises always targeting to the top-tier banking market segment. The Bank is supervised by the Bank of Greece as well as by the European Supervisory Authorities, which are responsible for the supervision of banking institutions.

With PSD-II evolution, the Bank required a contemporary, robust, flexible and scalable **Strong Customer Authentication solution** to service her Internet Banking customers' remote authentication needs while also **covering PSD-II** strict technical and security requirements.

The Bank places its customers at the center of its activities and has been committed to offer top quality products and services. In order to meet customers' requirements, the Bank continuously invest in new technologies responding to customers' evolving needs through traditional and innovative banking products and services. The Bank would like to address both customers experience and security and therefore was driven to provide a remote authentication solution that would be convenient – easy to setup and use and also highly secure.

The bank selected **CubelQ's Strong Customer Authentication, PSD-II compliant technology** which includes also **HID ActivID™** Authentication server and **HID Approve™** mobile application client.

ActivID™ is a omni channel customer and transaction enterprise-wide authentication server, scalable from several hundred to several million users, covering all possible needs for customers, users and transactions authentication in the financial, government, healthcare and enterprise industries and supporting all known authentication clients such as hardware tokens,

smart cards, biometric devices, soft tokens, SMS, mobile clients, certificates, adaptive clients and other.

HID Approve™ is a mobile authentication client incorporating and using “push notification” technology, dual communication channels, secure execution environment and RSA cryptographic technology. It is provided as “white label” or branded mobile application or as an SDK to be integrated to mobile banking or other mobile application.
